Chemical Physics 191 (1995) 353–361

Chemical Physics

Subject index to volume 191

Methods

Theoretical

Classical mechanics

A comparison between experimental, quantum and quasiclassical properties for the $N(^4S)+O_2(X\ ^3\Sigma_g)\rightarrow NO(X\ ^2\Pi)+O(^3P)$ reaction, M. Gilibert, X. Giménez, M. González, R. Sayós and A. Aguilar 191 (1995) 1

The nonlinear stretching model of hydrogen bonds and local self-fluctuation of base rotation in DNA, C.-T. Zhang and K.-C. Chou 191 (1995) 17

Coupling schemes and perturbative treatments

A study of the carbon–halogen bond breaking in tert-butyl halides by the PM3 quantum chemical method, V.A. Tikhomirov, E.D. German and A.M. Kuznetsov 191 (1995) 25

Transport quantum mechanics

Theory of excitation energy transfer in the primary processes of photosynthesis. III. Mono-exponential regime, J. Dvořák and L. Skála 191 (1995) 31

Equilibrium statistical mechanics

Forward and reverse electronic energy transport and trapping in solution. I. Theory, L. Kułak and C. Bojarski 191 (1995) 43

Forward and reverse electronic energy transport and trapping in solution. II. Numerical results and Monte Carlo simulations, L. Kułak and C. Bojarski 191 (1995) 67

Non-equilibrium thermodynamic and hydrodynamic theories

Diffusional description of vibrational relaxation in a binary mixture of diatomic molecules – quantum oscillators, O.V. Skrebkov 191 (1995) 87

A modification of the non-Markovian encounter theory. III. Hopping and diffusion mechanisms of reactions, A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov 191 (1995) 101

Ab initio schemes for stationary properties

Ab initio study of the LiH^+ molecule, electronic interaction analysis and LiH UV photoelectron spectrum, H. Berriche and F.X. Gadea 191 (1995) 119

A method for including environment polarization effects in ab initio cluster embedded calculations. Application to the water deprotonation over an ideal Al–MgO surface, J.A. Mejías, J. Oviedo and J. Fernández Sanz 191 (1995) 133
Density functional calculations of excitation energies and oscillator strengths for C1s→π* and O1s→π* excitations and ionization potentials in carbonyl containing molecules, M. Stener, A. Lisini and P. Decleva 191 (1995) 141
The lowest-lying Rydberg states of Si_2: an ab initio study, F.L. Sefyani and J. Schamps 191 (1995) 155
The energetics of fragmentation of the naphthalene cation, G. Granucci, Y. Ellinger and P. Boissel 191 (1995) 165

Computational and simulation methods
Pressure-induced phase transitions in 9,10-anthracene derivatives: anthraquinone, A. Brillante, R.G. Della Valle, R. Farina and E. Venuti 191 (1995) 177
Spin–lattice relaxation in Mössbauer spectra of metmyoglobin: investigation of crystals, water and water–glycerol solutions, A.R. Bizzarri, O.A. Iakovleva and F. Parak 191 (1995) 185
Molecular dynamics study of water adopting a potential function with explicit atomic dipole moments and anisotropic polarizabilities, P.-O. Åstrand, P. Linse and G. Karlström 191 (1995) 195

Molecular dynamics and scattering theory
A comparison between experimental, quantum and quasiclassical properties for the $N(^4S)+O_2(X\,^3\Sigma_g)\rightarrow NO(X\,^2\Pi)+O(^3P)$ reaction, M. Gilibert, X. Giménez, M. González, R. Sayós and A. Aguilar 191 (1995) 1
Theoretical study of interactions among surface defects by He scattering technique: the reason for the failure of the cross section geometric overlap hypothesis, G. Petrella and L. Cassidei 191 (1995) 203
Accurate inelastic scattering factors for lithium to argon calculated from MR-SDCI wavefunctions, H. Meyer, T. Müller and A. Schweig 191 (1995) 213
Potential energy surface effects on differential cross sections for polyatomic reactions, G. Nyman, D.C. Clary and R.D. Levine 191 (1995) 223
Adiabatically corrected quasiclassical model for the vibrational predissociation of van der Waals complexes, Y. Karni and E.E. Nikitin 191 (1995) 235
Wave packet calculations on ion–molecule reactions, N. Marković and G.D. Billing 191 (1995) 247

Experimental

Raman spectroscopy
Pressure-induced phase transitions in 9,10-anthracene derivatives: anthraquinone, A. Brillante, R.G. Della Valle, R. Farina and E. Venuti 191 (1995) 177

Visible and UV spectroscopy
Ab initio study of the LiH^+ molecule, electronic interaction analysis and LiH UV photoelectron spectrum, H. Berriche and F.X. Gadea 191 (1995) 119
Determination of the vibrationless level of Sn states of chlorobenzene by double resonance multiphoton ionization photoelectron spectroscopy. Evidence of IVR within these states, P. Asselin, F. Piuzzi, M. Mons and I. Dimicoli 191 (1995) 261

Fluorescence spectroscopy
Forward and reverse electronic energy transport and trapping in solution. I. Theory, L. Kułak and C. Bojarski 191 (1995) 43
Forward and reverse electronic energy transport and trapping in solution. II. Numerical results and Monte Carlo simulations, L. Kułak and C. Bojarski 191 (1995) 67
Pressure-induced phase transitions in 9,10-anthracene derivatives: anthraquinone, A. Brillante, R.G. Della Valle, R. Farina and E. Venuti 191 (1995) 177
Photochemistry in jet-cooled aniline derivatives, C. Dedonder-Lardeux, C. Jouvet, S. Martrenchard, D. Solgadi, J. McCombie, B.D. Howells, T.F. Palmer, A. Subaric-Leitis, C. Monte, W. Rettig and P. Zimmermann 191 (1995) 271

Photoelectron and Auger spectroscopy
Determination of the vibrationless level of Sn states of chlorobenzene by double resonance multiphoton ionization photoelectron spectroscopy. Evidence of IVR within these states, P. Asselin, F. Piuzzi, M. Mons and I. Dimicoli 191 (1995) 261

X-ray spectroscopy
Experimental and ab initio study of the molybdenum K and L edges excitation in $Mo(CO)_6$ and MoF_6, F. Guillot, C. Dézarnaud-Dandine, M. Tronc, A. Lisini, P. Decleva and G. Fronzoni 191 (1995) 289

Picosecond spectroscopy
Picosecond transient spectral hole-burning studies on oxazine 750 in a silicate xerogel, P. Weidner and A. Penzkofer 191 (1995) 303

Non-linear optical spectroscopy
Picosecond transient spectral hole-burning studies on oxazine 750 in a silicate xerogel, P. Weidner and A. Penzkofer 191 (1995) 303

Synchrotron spectroscopies
Photochemistry in jet-cooled aniline derivatives, C. Dedonder-Lardeux, C. Jouvet, S. Martrenchard, D. Solgadi, J. McCombie, B.D. Howells, T.F. Palmer, A. Subaric-Leitis, C. Monte, W. Rettig and P. Zimmermann 191 (1995) 271

Time-resolved experiments
Forward and reverse electronic energy transport and trapping in solution. I. Theory, L. Kułak and C. Bojarski 191 (1995) 43
Forward and reverse electronic energy transport and trapping in solution. II. Numerical results and Monte Carlo simulations, L. Kułak and C. Bojarski 191 (1995) 67
Charge transport in molecularly doped polymers at low dopant concentrations: simulation and experiment, B. Hartenstein, H. Bässler, S. Heun, P. Borsenberger, M. Van der Auweraer and F.C. De Schryver 191 (1995) 321

Mass spectrometry
Photochemistry in jet-cooled aniline derivatives, C. Dedonder-Lardeux, C. Jouvet, S. Martrenchard, D. Solgadi, J. McCombie, B.D. Howells, T.F. Palmer, A. Subaric-Leitis, C. Monte, W. Rettig and P. Zimmermann 191 (1995) 271

The dissociative ionization of C_2H_2 and C_2D_2. The $[CH(CD)]^+$ dissociation channel. The H(D)C≡C(D)H binding energy, M. Davister and R. Locht 191 (1995) 333

Mössbauer spectroscopy
Spin–lattice relaxation in Mössbauer spectra of metmyoglobin: investigation of crystals, water and water–glycerol solutions, A.R. Bizzarri, O.A. Iakovleva and F. Parak 191 (1995) 185

Objects

Bulk systems

Gases
Diffusional description of vibrational relaxation in a binary mixture of diatomic molecules – quantum oscillators, O.V. Skrebkov 191 (1995) 87
Determination of the vibrationless level of Sn states of chlorobenzene by double resonance multiphoton ionization photoelectron spectroscopy. Evidence of IVR within these states, P. Asselin, F. Piuzzi, M. Mons and I. Dimicoli 191 (1995) 261
Experimental and ab initio study of the molybdenum K and L edges excitation in $Mo(CO)_6$ and MoF_6, F. Guillot, C. Dézarnaud-Dandine, M. Tronc, A. Lisini, P. Decleva and G. Fronzoni 191 (1995) 289
The dissociative ionization of C_2H_2 and C_2D_2. The $[CH(CD)]^+$ dissociation channel. The H(D)C≡C(D)H binding energy, M. Davister and R. Locht 191 (1995) 333

Liquids neat
Molecular dynamics study of water adopting a potential function with explicit atomic dipole moments and anisotropic polarizabilities, P.-O. Åstrand, P. Linse and G. Karlström 191 (1995) 195

Liquids mixtures and solutions
Forward and reverse electronic energy transport and trapping in solution. I. Theory, L. Kułak and C. Bojarski 191 (1995) 43
Forward and reverse electronic energy transport and trapping in solution. II. Numerical results and Monte Carlo simulations, L. Kułak and C. Bojarski 191 (1995) 67
A modification of the non-Markovian encounter theory. III. Hopping and diffusion mechanisms of reactions, A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov 191 (1995) 101

Crystals
Pressure-induced phase transitions in 9,10-anthracene derivatives: anthraquinone, A. Brillante, R.G. Della Valle, R. Farina and E. Venuti 191 (1995) 177

Polymers
The nonlinear stretching model of hydrogen bonds and local self-fluctuation of base rotation in DNA, C.-T. Zhang and K.-C. Chou 191 (1995) 17
Charge transport in molecularly doped polymers at low dopant concentrations: simulation and experiment, B. Hartenstein, H. Bässler, S. Heun, P. Borsenberger, M. Van der Auweraer and F.C. De Schryver 191 (1995) 321

Surfaces

A method for including environment polarization effects in ab initio cluster embedded calculations. Application to the water deprotonation over an ideal Al–MgO surface, J.A. Mejías, J. Oviedo and J. Fernández Sanz 191 (1995) 133

Theoretical study of interactions among surface defects by He scattering technique: the reason for the failure of the cross section geometric overlap hypothesis, G. Petrella and L. Cassidei 191 (1995) 203

Biological systems

The nonlinear stretching model of hydrogen bonds and local self-fluctuation of base rotation in DNA, C.-T. Zhang and K.-C. Chou 191 (1995) 17

Microscopic systems

Atoms

Accurate inelastic scattering factors for lithium to argon calculated from MR-SDCI wavefunctions, H. Meyer, T. Müller and A. Schweig 191 (1995) 213

Molecules (neutral and ionic)

Density functional calculations of excitation energies and oscillator strengths for C1s→π^* and O1s→π^* excitations and ionization potentials in carbonyl containing molecules, M. Stener, A. Lisini and P. Decleva 191 (1995) 141

–diatomic

A comparison between experimental, quantum and quasiclassical properties for the $N(^4S)+O_2(X\,^3\Sigma_g^-)\rightarrow NO(X\,^2\Pi)+O(^3P)$ reaction, M. Gilibert, X. Giménez, M. González, R. Sayós and A. Aguilar 191 (1995) 1

Diffusional description of vibrational relaxation in a binary mixture of diatomic molecules – quantum oscillators, O.V. Skrebkov 191 (1995) 87

Ab initio study of the LiH^+ molecule, electronic interaction analysis and LiH UV photoelectron spectrum, H. Berriche and F.X. Gadea 191 (1995) 119

The lowest-lying Rydberg states of Si_2: an ab initio study, F.L. Sefyani and J. Schamps 191 (1995) 155

–small polyatomics

A study of the carbon–halogen bond breaking in tert-butyl halides by the PM3 quantum chemical method, V.A. Tikhomirov, E.D. German and A.M. Kuznetsov 191 (1995) 25

Potential energy surface effects on differential cross sections for polyatomic reactions, G. Nyman, D.C. Clary and R.D. Levine 191 (1995) 223

Experimental and ab initio study of the molybdenum K and L edges excitation in $Mo(CO)_6$ and MoF_6, F. Guillot, C. Dézarnaud-Dandine, M. Tronc, A. Lisini, P. Decleva and G. Fronzoni 191 (1995) 289

The dissociative ionization of C_2H_2 and C_2D_2. The $[CH(CD)]^+$ dissociation channel. The H(D)C≡C(D)H binding energy, M. Davister and R. Locht 191 (1995) 333

–aromatics

The energetics of fragmentation of the naphthalene cation, G. Granucci, Y. Ellinger and P. Boissel 191 (1995) 165

Determination of the vibrationless level of Sn states of chlorobenzene by double resonance multiphoton ionization photoelectron spectroscopy. Evidence of IVR within these states, P. Asselin, F. Piuzzi, M. Mons and I. Dimicoli 191 (1995) 261
Photochemistry in jet-cooled aniline derivatives, C. Dedonder-Lardeux, C. Jouvet, S. Martrenchard, D. Solgadi, J. McCombie, B.D. Howells, T.F. Palmer, A. Subaric-Leitis, C. Monte, W. Rettig and P. Zimmermann 191 (1995) 271
Picosecond transient spectral hole-burning studies on oxazine 750 in a silicate xerogel, P. Weidner and A. Penzkofer 191 (1995) 303

–other large
Density functional calculations of excitation energies and oscillator strengths for C1s→π* and O1s→π* excitations and ionization potentials in carbonyl containing molecules, M. Stener, A. Lisini and P. Decleva 191 (1995) 141

–polymeric and biological
Spin–lattice relaxation in Mössbauer spectra of metmyoglobin: investigation of crystals, water and water–glycerol solutions, A.R. Bizzarri, O.A. Iakovleva and F. Parak 191 (1995) 185

Molecular aggregates
Theory of excitation energy transfer in the primary processes of photosynthesis. III. Mono-exponential regime, J. Dvořák and L. Skála 191 (1995) 31

–dimers
Molecular dynamics study of water adopting a potential function with explicit atomic dipole moments and anisotropic polarizabilities, P.-O. Åstrand, P. Linse and G. Karlström 191 (1995) 195

Defects and impurities
Theoretical study of interactions among surface defects by He scattering technique: the reason for the failure of the cross section geometric overlap hypothesis, G. Petrella and L. Cassidei 191 (1995) 203

Phenomena

Molecular structure
The energetics of fragmentation of the naphthalene cation, G. Granucci, Y. Ellinger and P. Boissel 191 (1995) 165

Vibrations and rotations of molecules
A comparison between experimental, quantum and quasiclassical properties for the $N(^4S)+O_2(X\,^3\Sigma_g)\rightarrow NO(X\,^2\Pi)+O(^3P)$ reaction, M. Gilibert, X. Giménez, M. González, R. Sayós and A. Aguilar 191 (1995) 1
Diffusional description of vibrational relaxation in a binary mixture of diatomic molecules – quantum oscillators, O.V. Skrebkov 191 (1995) 87
Ab initio study of the LiH^+ molecule, electronic interaction analysis and LiH UV photoelectron spectrum, H. Berriche and F.X. Gadea 191 (1995) 119

Electronic structure and states
Ab initio study of the LiH^+ molecule, electronic interaction analysis and LiH UV photoelectron spectrum, H. Berriche and F.X. Gadea 191 (1995) 119
Density functional calculations of excitation energies and oscillator strengths for $C1s \rightarrow \pi^*$ and $O1s \rightarrow \pi^*$ excitations and ionization potentials in carbonyl containing molecules, M. Stener, A. Lisini and P. Decleva 191 (1995) 141
The lowest-lying Rydberg states of Si_2: an ab initio study, F.L. Sefyani and J. Schamps 191 (1995) 155
Spin–lattice relaxation in Mössbauer spectra of metmyoglobin: investigation of crystals, water and water–glycerol solutions, A.R. Bizzarri, O.A. Iakovleva and F. Parak 191 (1995) 185
Experimental and ab initio study of the molybdenum K and L edges excitation in $Mo(CO)_6$ and MoF_6, F. Guillot, C. Dézarnaud-Dandine, M. Tronc, A. Lisini, P. Decleva and G. Fronzoni 191 (1995) 289
Charge transport in molecularly doped polymers at low dopant concentrations: simulation and experiment, B. Hartenstein, H. Bässler, S. Heun, P. Borsenberger, M. Van der Auweraer and F.C. De Schryver 191 (1995) 321

Electric and magnetic properties
Charge transport in molecularly doped polymers at low dopant concentrations: simulation and experiment, B. Hartenstein, H. Bässler, S. Heun, P. Borsenberger, M. Van der Auweraer and F.C. De Schryver 191 (1995) 321

Molecular interactions
Potential energy surface effects on differential cross sections for polyatomic reactions, G. Nyman, D.C. Clary and R.D. Levine 191 (1995) 223

Spectral bandshapes and intensities
Picosecond transient spectral hole-burning studies on oxazine 750 in a silicate xerogel, P. Weidner and A. Penzkofer 191 (1995) 303

Energy transfer processes
Theory of excitation energy transfer in the primary processes of photosynthesis. III. Mono-exponential regime, J. Dvořák and L. Skála 191 (1995) 31
Forward and reverse electronic energy transport and trapping in solution. I. Theory, L. Kułak and C. Bojarski 191 (1995) 43
Forward and reverse electronic energy transport and trapping in solution. II. Numerical results and Monte Carlo simulations, L. Kułak and C. Bojarski 191 (1995) 67
Diffusional description of vibrational relaxation in a binary mixture of diatomic molecules – quantum oscillators, O.V. Skrebkov 191 (1995) 87

Intramolecular dynamics
Spin–lattice relaxation in Mössbauer spectra of metmyoglobin: investigation of crystals, water and water–glycerol solutions, A.R. Bizzarri, O.A. Iakovleva and F. Parak 191 (1995) 185

–radiationless transitions
A study of the carbon–halogen bond breaking in tert-butyl halides by the PM3 quantum chemical method, V.A. Tikhomirov, E.D. German and A.M. Kuznetsov 191 (1995) 25

–vibrational energy redistribution (including vibrational dissociation)
Adiabatically corrected quasiclassical model for the vibrational predissociation of van der Waals complexes, Y. Karni and E.E. Nikitin 191 (1995) 235
Determination of the vibrationless level of Sn states of chlorobenzene by double resonance multiphoton ionization photoelectron spectroscopy. Evidence of IVR within these states, P. Asselin, F. Piuzzi, M. Mons and I. Dimicoli 191 (1995) 261

Luminescence spectra, yields and lifetimes
The lowest-lying Rydberg states of Si_2: an ab initio study, F.L. Sefyani and J. Schamps 191 (1995) 155
Picosecond transient spectral hole-burning studies on oxazine 750 in a silicate xerogel, P. Weidner and A. Penzkofer 191 (1995) 303

Reactions (including dissociation)
A modification of the non-Markovian encounter theory. III. Hopping and diffusion mechanisms of reactions, A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov 191 (1995) 101

–gas phase
A comparison between experimental, quantum and quasiclassical properties for the $N(^4S)+O_2(X\ ^3\Sigma_g)\rightarrow NO(X\ ^2\Pi)+O(^3P)$ reaction, M. Gilibert, X. Giménez, M. González, R. Sayós and A. Aguilar 191 (1995) 1
Potential energy surface effects on differential cross sections for polyatomic reactions, G. Nyman, D.C. Clary and R.D. Levine 191 (1995) 223
Wave packet calculations on ion–molecule reactions, N. Marković and G.D. Billing 191 (1995) 247
The dissociative ionization of C_2H_2 and C_2D_2. The $[CH(CD)]^+$ dissociation channel. The $H(D)C{\equiv}C(D)H$ binding energy, M. Davister and R. Locht 191 (1995) 333

–condensed phase
A study of the carbon–halogen bond breaking in tert-butyl halides by the PM3 quantum chemical method, V.A. Tikhomirov, E.D. German and A.M. Kuznetsov 191 (1995) 25
A modification of the non-Markovian encounter theory. III. Hopping and diffusion mechanisms of reactions, A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov 191 (1995) 101

–photochemical
Photochemistry in jet-cooled aniline derivatives, C. Dedonder-Lardeux, C. Jouvet, S. Martrenchard, D. Solgadi, J. McCombie, B.D. Howells, T.F. Palmer, A. Subaric-Leitis, C. Monte, W. Rettig and P. Zimmermann 191 (1995) 271

Electron transfer
A study of the carbon–halogen bond breaking in tert-butyl halides by the PM3 quantum chemical method, V.A. Tikhomirov, E.D. German and A.M. Kuznetsov 191 (1995) 25
Wave packet calculations on ion–molecule reactions, N. Marković and G.D. Billing 191 (1995) 247
Charge transport in molecularly doped polymers at low dopant concentrations: simulation and experiment, B. Hartenstein, H. Bässler, S. Heun, P. Borsenberger, M. Van der Auweraer and F.C. De Schryver 191 (1995) 321

Ionization (including Rydberg states)
The lowest-lying Rydberg states of Si_2: an ab initio study, F.L. Sefyani and J. Schamps 191 (1995) 155

The dissociative ionization of C_2H_2 and C_2D_2. The $[CH(CD)]^+$ dissociation channel. The H(D)C≡C(D)H binding energy, M. Davister and R. Locht 191 (1995) 333

Molecular motion (including diffusive)

Molecular dynamics study of water adopting a potential function with explicit atomic dipole moments and anisotropic polarizabilities, P.-O. Åstrand, P. Linse and G. Karlström 191 (1995) 195

Collective motion and excitations

The nonlinear stretching model of hydrogen bonds and local self-fluctuation of base rotation in DNA, C.-T. Zhang and K.-C. Chou 191 (1995) 17

Surface effects and catalysis

A method for including environment polarization effects in ab initio cluster embedded calculations. Application to the water deprotonation over an ideal Al–MgO surface, J.A. Mejías, J. Oviedo and J. Fernández Sanz 191 (1995) 133

Theoretical study of interactions among surface defects by He scattering technique: the reason for the failure of the cross section geometric overlap hypothesis, G. Petrella and L. Cassidei 191 (1995) 203

Thermodynamic and transport properties

Molecular dynamics study of water adopting a potential function with explicit atomic dipole moments and anisotropic polarizabilities, P.-O. Åstrand, P. Linse and G. Karlström 191 (1995) 195

Phase transitions

Pressure-induced phase transitions in 9,10-anthracene derivatives: anthraquinone, A. Brillante, R.G. Della Valle, R. Farina and E. Venuti 191 (1995) 177
